Career Objective

A passionate and hardworking B.Tech IT student currently in 3rd year, seeking opportunities to apply and enhance my skills in web development and software engineering through internships. Eager to contribute to impactful projects while learning in a collaborative environment.

Education

Aditya College of Engineering and Technology, B.Tech in Information Technology

- Current Year: 3rd Year (as of 2025)
- Relevant Courses: DBMS, Web Development, Operating Systems, Python, Cloud Computing

Experience

Web Development Intern, APSSDC – Online

- Completed internship focused on Django-based web application development.
- Created a fully functional Event Management System as the final project.
- Learned MVC pattern, Django templates, authentication, forms, and CRUD operations.

Projects

Mechanic Map - Location-Based Web App

- Full-stack platform to connect vehicle owners with nearby mechanics using live location.
- Included Razorpay payments, SOS alert, feedback system, and mobile-friendly UI.
- Stack: Flask, HTML/CSS, Bootstrap, SQLite

Event Management System

- Built during APSSDC internship for booking and managing events with user login and feedback.
- Used Django authentication, templates, and admin features.
- Stack: Python, Django, Bootstrap, SQLite

Certifications

Introduction to Cloud Computing – IBM via edX

Google AI for Anyone – Google via edX

48 Robot Development – FedericaX, Università di Napoli Federico II via edX

Self-Learning with GeeksforGeeks

- Practicing DBMS (Transactions, Concurrency), Operating Systems, DSA
- Using quizzes, MCQs, and coding problems for hands-on learning

Technologies

Languages: Python, HTML, CSS, JavaScript, SQL, C

Frameworks & Tools: Flask, Django, Bootstrap, SQLite, Git, Replit, Tkinter
